

# Re-imagining Churches as Community Assets for the Common Good

## Churches and Communities Survey

Looking to the future following the Covid-19 pandemic, it is important that churches and deaneries gain a true and fair picture of the challenges and opportunities they now face. We already have access to important data collated by Church House in London through churches' annual returns and census data. However, the most important evidence to support us in planning for the future is the local knowledge that only PCCs themselves have, about their church buildings, how they are used, and how they are valued locally.

The Diocese of Ely established the REACH Ely project in association with Cambridge Judge Business School, and with the support of the Allchurches Trust and Historic England, to gather evidence of the wider community use of church buildings and the contribution that churches make to the common good. The project began with forty-one case studies of a wide range of different churches across the diocese. Out of those case studies the project team has designed this survey to collect the local information that will matter to the future of all our churches.

Your responses to this survey will contribute directly to assessing the economic, spiritual, social, cultural and environmental value to communities of churches and church buildings. **We ask that your PCC, or equivalent management body, provides a corporate response to this survey** (an opportunity for individual voices to be heard will be provided later in the project). However, we anticipate that it will be filled in by one or two key people in each parish. Our suggestion is that this is one of the Churchwardens along with the clergy.

In order to do this, you will need to spend some time preparing. **Depending on answers, the survey will take about an hour to complete** and you will need a copy of your 2019 church accounts, your church services register and your most recent quinquennial report. You should be able to answer the remainder of the questions without prior research. If you do not have access to the information required by any of the questions, please give a best estimate or leave blank.

This paper copy of the survey questions is intended to help you prepare to make responding online quicker and easier. Once you have assembled all the answers (as far as you can) then they can be entered into the online survey by following the link below.

If you need help filling in the survey, help is available from the church buildings team at the diocese. Please don't hesitate to contact Geoffrey Hunter [geoffrey.hunter@elydiocese.org](mailto:geoffrey.hunter@elydiocese.org) to find out what help we can offer.

The purpose of gathering this information is to identify how churches can develop into the future. Given that the COVID-19 lockdown has led to the closure or only partial use of all churches and associated buildings, please tailor your responses to the typical usage of your church prior to March 2020. The questions are also tailored to the re-opening of churches and their post-COVID-19 usage.

## Important information about data protection

We are gathering information from all the churches in the Diocese of Ely to tell us about the value of church buildings, both for the church's mission and to their wider communities. The more churches who participate the better we will be able to demonstrate the value of church buildings.

Please read the notes below carefully. If you are happy to participate in this study, please click to confirm below.

- I understand the scope of this project and have had the opportunity to ask the researcher any questions that I have about the study and my involvement in it. I am aware that I can contact the researcher [t.alexandrov@jbs.cam.ac.uk](mailto:t.alexandrov@jbs.cam.ac.uk) or the Head of Church Buildings [geoffrey.hunter@elydiocese.org](mailto:geoffrey.hunter@elydiocese.org) at any time.
- I understand that personal data will be stored initially by the Cambridge Judge Business School whose privacy policy is [here](#). Once the survey is closed, all **personal** data will be moved to a secure server at CJBS, accessible only by CJBS IT staff and the REACH Ely research team (Timur Alexandrov, Helen Haugh, Geoffrey Hunter). Find out about how we process research participant data: [www.information-compliance.admin.cam.ac.uk/data-protection/research-participant-data](http://www.information-compliance.admin.cam.ac.uk/data-protection/research-participant-data)
- I agree that anonymised data may be used in publication of the results and shared with other researchers for future research. I understand that all efforts will be made to ensure I cannot be identified (except as may be required by law).
- I understand that I am free to withdraw at any time during the survey without giving a reason, by closing the browser.
- I confirm that I have read and understand the information above and voluntarily consent to participate in this study.

Please submit your response by **31 January 2021**.
