[BNThermic](#)

BN Thermic provide a comprehensive range of the highest quality industrial and commercial electric heaters. Over the years, we have developed and refined our range of heaters and associated controls enabling us to provide a heating solution for the majority of industrial and commercial heating applications, including our recently improved range of new heaters which we generally find the best solution for church heating.

[DiscreteHeat](#)

Providing alternative, reliable and above all, energy efficient heating solutions is what DiscreteHeat is all about. The two principal forms of room space heating - conventional radiators and under floor heating (UFH) - now have an established, dynamic and innovative alternative in ThermaSkirt - The Skirting Board that Heats Your Home

[Elco](#)

ELCO Heating Solutions Limited is an industry-leading supplier of the most efficient and reliable commercial heating systems. We have over 10 years of experience in the installation of sustainable heat pumps and energy efficient hybrid systems.

[GeoEnergy Design](#)

GeoEnergy Design are a design consultancy specialising in the integration of low carbon technologies, with particular interest in heat pumps. During their combined 75-years of experience, the team have designed over 400MW of operational heat pumps - arguably the most experienced specialist engineers in this field currently operating in the UK.

### Herschel-infrared

Herschel Infrared is the UK market leader in infrared heating with efficient, electric heating solutions for residential, commercial and industrial applications and has a significant role to play in the transition to net zero. With proven technology and experience of heating historic buildings, we have developed the concept of the Halo, a combined chandelier type heater that will combine low power LED lighting with our zero light far infrared heating emitters. The benefit of the Halo will be unobtrusive direct heating of occupants and the building itself, whilst also providing lighting when required. Our far infrared heating technology is a very pleasant wavelength for heating of people and is beneficial for the building, helping to drive out damp and preserve precious artefacts and interiors.

### Ingleton Wood

Ingleton Wood is a multi-disciplinary property and construction consultancy, providing a wide range of services across the majority of industry sectors including commercial, health, education, defence, residential and community.

Services include architecture, building surveying, building services engineering, planning, interior design, sustainability, civil and structural engineering, quantity surveying, project management, CDM and health and safety services.

### Inspired Efficiency

"Inspired Efficiency is an energy, carbon and sustainability consultancy that provides advice to organisations on how to be more energy efficiency and progress to achieve being Net Zero Carbon. It has a specialism in advising heritage and listed buildings and delivers energy audit programmes for diocese and church groups from many faiths".

### Kovoshmidt Ltd (Pew Heating)

"Kovoshmidt's patented heated pew seat system provides the best localised direct heating for churches with the lowest running cost - approx. £1 per hour for the whole church.  
We heat the person not the air!"
