Change your Environment (Rev Christine Kerr)

Scientists tell us that the earth's natural ecosystems have been affected by climate change, caused by pollution going into the ecological atmosphere. They say that little changes can make a big difference.

Jesus came to change our environment by restoring all things in Himself (Colossians 3 v 20) through His death and resurrection. Having authority, as joint heirs with Christ, we can change our environment, as we bring the Kingdom of God to people in crisis, as we show love, kindness, giving time or support to people in need.

ENGAGE: Pray for God to give you an idea or open your eyes to someone, today, who needs a touch of kindness, a word of encouragement, and let them know Jesus loves them and maybe offer a short prayer, to change the environment.

PRAYER: Father thank you for helping me to bring light, hope and change to someone today. Amen
