# Improvements to St Mary's Gate

As part of a drive to improve road safety and better connect Rochdale town centre to its surrounding neighbourhoods and Rochdale Infirmary, we are looking at making the following improvements to St Mary's Gate.

- Installation of a new crossing point close to Redcross Street and Howard Place with sections for pedestrians and cyclists.
- Improvements to the 40 space Reed Hill car park, which will include:
  - The closure of Howard Place with a new entry point being created in Hunters Lane.
  - Reconfiguration and relining of the car park to make it easier to navigate.

In addition, we will be resurfacing some of the paths around the new crossing point and making some improvements to the subway which connects High Street and Cheetham Street.
