

Parish share contributions remaining from 2021 and earlier

For those parishes with parish share arrears from 2021 and earlier we want to offer support and encouragement to those with an ability to contribute to these arrears.

This scheme will run through 2023 and 2024 after which all historic arrears will be reviewed on a parish by parish basis.

The proposal is for every £1 a parish contributes towards historic arrears, £2 will be deducted from that parish's historic arrears balance and £1 will be added to the deanery's generosity pool.

In order to make any such contribution the parish will need to be up to date with their in-year parish share payments.

For example:

A parish has £2,000 of contributions remaining from 2021 and earlier.

In 2023 the parish contributes the full Parish Share requested for that year and then contributes a further £400 to the historic balance. The Diocese will match the £400 the parish contributes towards the historic balance and will also contribute £400 towards the deanery's generosity pool.

In 2024 the parish contributes the full Parish Share requested for that year and then contributes a further £600 to the historic balance. The Diocese will match the £600 the parish contributed towards the historic balance and will also contribute £600 towards the deanery's generosity pool.
