

# Project for the day – Shaun the Sheep

Today I will be running a Shaun the Sheep themed project day.

I found this amazing website with loads of creative ideas to complete based on 'Shaun the Sheep' - <https://www.shaunthesheep.com/create>

## Design:

Design a farm (either using toys, construction resources or drawing it on paper).

What animals would you have on your farm? How big would it be?

## Computing:

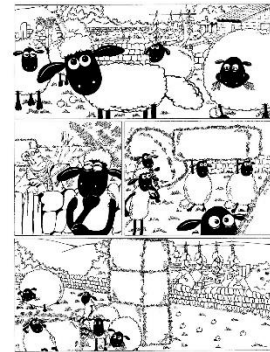

Create a model of yourself using playdough/clay. Using a tablet, phone or camera take pictures of your model in different locations/scenes!

Challenge –can you make small changes and create a short animation?

## Writing:

Can you come up with a new adventure for Shaun the Sheep and his friends? Write it as a story or create your own comic strip!

## PE:

Shaun creates an exercise class for his friends – can you create your own obstacle course/circuit in your house or garden? Maybe you could time how long it takes!

## Art:

We will be creating our own pomp pomp sheep following the instructions from the *create* website above.
