Case No:

1. Installation of external lighting through 10 x very dark grey bollards each 0.9m (3') tall, positioned to one side of the path, securely installed with a 0.5m base below the surface - spaced at 5m intervals from the steps to the Parish Centre / 8m intervals from the steps to existing lamppost & a further 2 to light the path from the gates to the lamppost.
2. Replace the motion sensor operated bulkhead light on the North Porch with a light designed to illuminate both the end of the porch and the path in front
3. Install a new (additional) emergency light to the southeast corner of the Parish Centre. The escape route leads people around the corner of the Parish Centre. This will ensure that the latter part of the escape route is lit. It is non-maintained, it would only be illuminated in the event of a power failure.
4. Install 2 further exterior lights, one each of the fire exit doors of the parish centre, so that the churchyard can be illuminated as required.
5. Replace the lamp, and clean the glass panels, of the existing lamppost to deliver double the present illumination.
6. Install the necessary cabling and switching for the above. Armoured cable needs to be laid in accordance with the red line marked on the plan, in a 500mm deep narrow trench, dug by hand to avoid disturbing any ancient burials. The total length of cable will be about 70m, a junction box waterproof to IP66 will be required adjacent to each bollard. The bollards will be switched from a panel by the entrance to the Parish Centre. In addition, the 2 current ceiling lights in the Parish Centre glazed corridor are operated by a sensor, i.e. they only switch on when someone moves inside the corridor. It is felt that it will be more effective to remove the sensor and have these lights operated by a switch, as the glazed corridor incorporates the entrance to the building, this should remain lit whenever the building is in use after dark.

DAC Certificate Conditions: -

01. That details of the works are entered in the Log Book so that a record is kept of what has been done
02. That the contractors should be aware of the possibility of fragmentary human remains being found in the course of the works.
