

Geography - children to identify countries involved in the war on a map and identify different areas of the UK which were bombed and which were areas where children were evacuated to.

Art—children will be working on pencil control, shading and technique and will build up to work on silhouettes linked to this term's topic.

Computing - computing will be taught cross-curricular this term through a range of other subjects. This term will focus on developing presentation skills

P.E. - children will be learning basic moves from popular WWII dances such as the lindy hop which they will then take to create their own dance. Children will also be put through their paces in an army boot camp (circuit training).

Maths —children will spend time looking in depth at a range of mathematical concepts from areas such as number and place value, the four calculation methods and fractions.

R.E. - during the autumn term, children will be learning about aspects of Hinduism including learning about what Hindus believe about God, how and why Hindus worship at home and in the mandir and how they express meaning through festivals.

World War II

Who showed the most courage during the Second World War?

History - Research life during World War 2 and how key events changed the British way of life. Look at the factors to why war broke out, how evacuees felt, the home front, the changing roles of women, the impact of rationing and the Blitz.

English—All children will cover a range of poetry, fiction and non-fiction writing. Year 3 will be completing work based on the BFG including adventure stories and biographies. Years 4,5 and 6 will be writing newspaper reports and stories based on life during World War Two.

Outdoor Learning—Outdoor learning will be led by the children this term and their interests and so will be planned as and when an area of interest is shown.

Music—children will learn about singing during this topic. They will be learning about breathing control and will apply this to practising for both the harvest and Christmas services. They will also be learning about the different parts to a choir and harmonies.

P.S.H.C.E. - children will focus on new beginnings at the beginning of the autumn term and will move onto looking at the idea of 'growth mindset' and how they can apply this idea in the classroom.

Languages—children will begin learning basic German.

Science—Year 3 will learn about animals including humans, including skeletons and muscles and will discuss what is meant by a healthy diet. Years 4,5 and 6 will discuss materials and their properties.
