

Science:

This term we will learn about how animals including humans have offspring which grow into adults. We will find out about and describe the basic need of animals, including humans for survival (Water, food and air). We will describe how animals obtain their food from plants and other animals. We will look at habitats and identify how different habitats provide for the basic needs of different types of animals.

Summer 2018

Year 2 & 3
Mrs Hodges

Art:

Year 2—3 We will explore wet felting with wool and create a felted piece of art.

Years 3—6 This term we will be looking at the work of crafts people and designers. We will explore the use of clay in art and learn some basic pottery skills. The children will learn about designers who work with pottery and create designs of their own. We will evaluate our work and that of others, commenting on areas to improve.

English:

This term the children will briefly revisit recount and letter writing and use these skills to write for a given audience. We have chosen two texts by Dick King-Smith to read and will learn all about the author before writing a biography and comparing texts. We will use the stories to influence our own writing and will write for a variety of purposes. We will continue to deepen our understanding of grammatical terms and will make links between our sentence structures, spelling rules and grammar work.

Maths:

The children will continue to develop their understanding of the four calculations. We will introduce a new initiative for learning multiplication facts (Maths Rock Stars). We will complete a unit of work on fractions and apply this knowledge to problem solving and reasoning activities. We will learn about position, direction and rotation, making links with fractions and angles. The children will continue to explore measurement, measuring in m, cm and mm. The year 3 group will look at lines and perimeters. We will explore 2D and 3D shapes and talk about their properties.
