

Science:

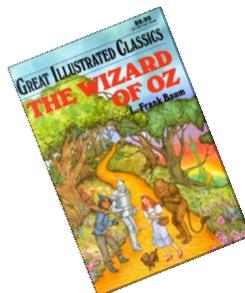

This term we will look at the differences between bulbs and seeds. We will learn how seeds grow from a seed to a plant and discover what a plant needs to thrive.

Later we will Explore the work of John Dunlop, identify and compare the usefulness of certain materials when forces are applied

Finally we will learn about the work of Charles Macintosh, How can the properties of materials can be changed

Autumn 2017

Year 2 & 3

Mrs Hodges

Art: Years 3—6

We will introduce the children to the work of the Impressionists – who were they? When were they working and which painters are they most famous for. We will talk about the compositions of the impressionists and what sort of images were they often depicting. We will trial new painting techniques and continue on to create final compositions in an impressionist style. We will evaluate our work and that of others, saying what works effectively and what could be done to improve them.

English: This term we will revisit the 'leader feeder' handwriting style and set clear expectations for our written work. We will work on securing basic sentence punctuation for the four main types of sentence, and learn some new sentence structures. We will start the term with a traditional tale and a well known innovation before writing our own. Later we will read the story of the Wizard of Oz and compare and contrast with the film. We will practise the skill of storytelling and create story maps to help us retell tales. We will use the stories to inspire our writing for different purposes, and will use these texts to support our reading comprehension skills.

Maths:

This term the children will focus on three main themes. We will start by consolidating our understanding of place value. We will use a variety of mathematical manipulatives and drawn visual methods of showing numbers. We will move on to addition and subtraction work where we will learn new methods of calculation. Later on we will cover multiplication and division. Throughout these themes we will work to improve their fluency, problem solving and reasoning skills.
