

Our Top Tips for Staying Safe Online

1 Always ask an adult before going online.

Adults need to make sure devices and apps you are using are safe and appropriate for children.

2 Don't share any of your personal information.

Personal information is anything that is unique to you such as your name, where you live, your phone number, your email address, and even your school.

3 Don't accept friend requests from people you don't know.

Always tell an adult if someone you don't know tries to contact you online.

4 Be kind and polite to others when you are online.

If anyone is unkind to you or sends you nasty messages, do not reply and tell an adult.

5 Don't click on any pop-ups or download anything without checking with an adult first.

It could put a nasty virus on your device that will stop it working.
