

## October 2020

Bosley St Mary's CE Primary School children have been having lots of fun in school this last month. We took part in World Mental Health Day where children explored feelings of worry. Class 1 created worry dolls and Class 2 made their own worry monsters. We talked about different feelings and emotions and what we can do when we are feeling worried or cross.

We have taken part in World Maths Day where the children did exciting maths activities, including lots of outdoor learning. Class 2 also found out about some famous mathematicians.

Although it was a little different this year, our harvest assembly was also very active.

Children have also enjoyed lots of different learning activities. I know 'dirt pies' in science were a huge success for Year 3 and 4!
