## MDTi Sky Dive for Prostate Cancer UK

On Friday 28th June CEO of MDTi, Martin took part in a charity skydive for Prostate Cancer UK together with the Greater Birmingham Chamber of Commerce in conjunction with Andy Street, Mayor of West Midlands Combined Authority Giving Day.

Prostate Cancer UK is a fantastic charity. Their primary focus is on funding research to stop prostate cancer killing men. They invest millions of pounds into research to find ways to test men better, in order to catch cancer earlier and to improve screening, so thousands of lives can be saved.

Not only did we have a fantastic day and Martin did us all proud, but we are pleased to announce that over £25,000 was raised for Prostate Cancer UK! Here are some photos from the day!

Special points of interests:

- MDTi are Proud Sponsors of COSRT Conference in London.
- MDTi Were Delighted To Attend The Bournemouth Air Show
- Femmax vaginal dilators & trainers

## MDTi are Proud Sponsors of College of Sexual Relationship Therapists Conference in London.

MDTi was pleased to sponsor the College of Sexual Relationship Therapists conference in London in June.

Prof. Michael Kirby examined the physiological side of each life stage, followed by four professional, experienced therapists; Tim Blackstone, Angela Gregory, Sally Openshaw and Dr Stuart Brody.

## MDTi Sponsors the Gynaecology Late Effects of Pelvic Treatment and Difficult Conversations event.

MDTi is proud to be sponsoring the Gynaecology Late Effects of Pelvic Treatment and Difficult Conversations event, which is happening later this month, on the 24th September in Greater Manchester by Greater Manchester Cancer.

An event which is aiming to spread the knowledge to help healthcare colleagues continue professional development and covering topics from menopause to sexuality and bowel toxicities, to body image and psychological aspects of treatment - for further details click here: <https://www.eventbrite.com/e/gynaecology-late-effects-of-pelvic-treatment-and-difficult-conversations-tickets-62191021018>

## Femmax vaginal dilators & trainers

MDTi commercialises the Femmax vaginal dilators/trainers, an NHS innovation invented by Macmillan Specialist Clinical Nurse Joan Thomas when she was at New Cross Hospital in Wolverhampton.

The Femmax can be used to help women with psychosexual conditions such as vaginismus.

The NHS widely uses the Femmax for post pelvic radiotherapy treatment and psychosexual therapy. The Instructions for Use includes a section by Mary Clegg, an Accredited Sex and Relationship Psychotherapist on how to use the Femmax dilators/trainers for psychosexual therapy. ([www.maryclegg.co.uk](http://www.maryclegg.co.uk))

There is a video on the MDTi website Femmax page (<https://www.mdti.co.uk/products/femmax/>) with Mary talking about dilators use for sexual difficulties. There are also videos on Lichen Sclerosus and Vulval Lichen Planus.

## Nehemiah Housing 30th Anniversary!

We were thrilled to congratulate Nehemiah Housing on their 30th anniversary!

People enjoyed their service of praise and thanksgiving. Here is what Nehemiah Housing has to say:

*"Hallelujah! What a wonderful way to celebrate. Thank you to @TheKingdomChoir and everyone who supported and attended our service of praise and thanksgiving to mark our 30th anniversary. It's been a truly uplifting and memorable day."*

— Nehemiah Housing (@NehemiahHousing) July 20, 2019

## MDTi CEO, Martin Levermore Spoke at the Joining The Dots Launch Event

Joining The Dots was initially launched in November last year in Cork, Ireland by Robin Barnett (British Ambassador to Ireland), with the help of Tánaiste and Cork Chamber. The aim is to promote stronger business partnerships and collaborations.

MDTi CEO, Prof. Martin Levermore had the pleasure of speaking on a panel. He is a visiting Professor for Health, Education and Life Science at Birmingham City University. As well as being one of the founders of the West Midlands Medical Devices industry network, known as Medilink, his work has led to £15 million of inward investment into the West Midlands, creating over 300 jobs within the region.

The panel Martin took place in was looking at 'Creating Thriving Regional Economies'. The discussion looks at the success criteria for regional economies, as well as exploring how education, skills, transport and communications can transform our regions into vibrant economic hubs.

CEO of Medical Devices Technology International Ltd (MDTi)  
Martin is Visiting Professor for Health, Education and Life Science at Birmingham City University. He is one of the founders of the West Midlands Medical Devices industry network known as Medilink. Over time, Martin's work has resulted in £15 million of inward investment into the West Midlands and has sustained over 300 jobs within the region during the decline in the industrial base within the region.

### MDTi Were Delighted To Attend The Bournemouth Air Show

CEO Professor Martin Levermore MBE, DL and MDTi were delighted to attend the Bournemouth Air Show at the invite of Brigadier Jock Fraser Royal Marines and Lieutenant Commander Suzanne Lynch to watch the Air Display from HMS Biter, where skills and opportunities of a career in the Royal Navy were showcased. West Midlands Police officers and young people from various communities were also hosted including a representative of the TNCMC, The National Caribbean Monument Charity.
