

Freedom of Information Publication Scheme

Introduction

The Freedom of Information Act 2000 provides public access to information held by public authorities. It does this in two ways:

- Public authorities are obliged to publish certain information about their activities; and
- Members of the public are entitled to request information from public authorities.

Public authorities include government departments, local authorities, the NHS, state schools and police forces.

The Act does not give people access to their own personal data (information about themselves). If a member of the public wants to see information that a public authority holds about them, they should make a subject access request under the Data Protection Act 1998.

Publication Scheme

As well as responding to requests for information, public authorities must publish information proactively. The Freedom of Information Act requires every public authority to have a publication scheme, approved by the Information Commissioner's Office (ICO), and to publish information covered by the scheme.

The scheme must set out your commitment to make certain classes of information routinely available, such as policies and procedures, minutes of meetings, annual reports and financial information.

St Thomas and St Anne's CE Primary School has adopted the model publication which is found in Appendix 1.

This policy was approved by the Full Governing Body 18 November 2020 and will be reviewed every two years.

Freedom of Information Act

This model publication scheme has been prepared and approved by the Information Commissioner. It may be adopted without modification by any public authority without further approval and will be valid until further notice.

This publication scheme commits an authority to make information available to the public as part of its normal business activities. The information covered is included in the classes of information mentioned below, where this information is held by the authority. Additional assistance is provided to the definition of these classes in sector specific guidance manuals issued by the Information Commissioner.

The scheme commits an authority:

- To proactively publish or otherwise make available as a matter of routine, information, including environmental information, which is held by the authority and falls within the classifications below.
- To specify the information which is held by the authority and falls within the classifications below
- To proactively publish or otherwise make available as a matter of routine, information in line with the statements contained within this scheme.
- To produce and publish the methods by which the specific information is made routinely available so that it can be easily identified and accessed by members of the public.
- To review and update on a regular basis the information the authority makes available under this scheme.
- To produce a schedule of any fees charged for access to information which is made proactively available.
- To make this publication scheme available to the public.
- To publish any dataset held by the authority that has been requested, and any updated versions it holds, unless the authority is satisfied that it is not appropriate to do so; to publish the dataset, where reasonably practicable, in an electronic form that is capable of re-use; and, if any information in the dataset is a relevant copyright work and the public authority is the only owner, to make the information available for re-use under a specified licence. The term 'dataset' is defined in section 11(5) of the Freedom of Information Act. The terms 'relevant copyright work' and 'specified licence' are defined in section 19(8) of that Act

These charges will be in accordance with either regulations made under section 11B of the Freedom of Information Act or other enactments.
