Medical Conditions Policy 2023-24

Supporting Pupils with Special Medical Needs

Definition

Pupils' medical needs may be broadly summarised as being of two types:

- (a) Short-term affecting their participation in school activities which they are on a course of medication for.
- (b) Long-term potentially limiting their access to education and requiring extra care and support (deemed **special medical needs**).

Rationale

LAs and schools have a responsibility for the health and safety of pupils in their care. The Health and Safety at Work Act 1974 makes employers responsible for the health and safety of employees and anyone else on the premises. In the case of pupils with special medical needs, the responsibility of the employer is to make sure that safety measures cover the needs of all pupils at the school. This may mean making special arrangements for particular pupils who may be more at risk than their classmates. Individual procedures may be required. The employer is responsible for making sure that relevant staff know about and are, if necessary, trained to provide any additional support these pupils may need.

The Children and Families Act 2014, from September 2014, places a duty on schools to make arrangements for children with medical conditions. **Pupils with special medical needs have the same right of admission to school as other children and cannot be refused admission or excluded from school on medical grounds alone.** However, teachers and other school staff in charge of pupils have a common law duty to act in loco parentis and may need to take swift action in an emergency. This duty also extends to teachers leading activities taking place off the school site. This could extend to a need to administer medicine.

The prime responsibility for a child's health lies with the parent who is responsible for the child's medication and should supply the school with information. The school takes advice and guidance from the Shropshire Council Medicines in Schools section of the Health and Safety Policy which encourages self-administration of medication when possible. Contact details for our School Nurse can be found in the school prospectus which also states a copy of this policy is available to parents.

Aims

The school aims to:

- assist parents in providing medical care for their children;
- educate staff and children in respect of special medical needs;
- adopt and implement the LA policy of Medication in Schools;
- arrange training for volunteer staff to support individual pupils;
- liaise as necessary with medical services in support of the individual pupil;
- ensure access to full education if possible.
- monitor and keep appropriate records.

Entitlement

The school accepts that pupils with medical needs should be assisted if at all possible and that they have a right to the full education available to other pupils. The school believes that pupils with medical needs should be enabled to have full attendance and receive necessary proper care and support.

The school accepts all employees have rights in relation to supporting pupils with medical needs as follows:

- choose whether or not they are prepared to be involved;
- receive appropriate training;
- work to clear guidelines;
- have concerns about legal liability;
- bring to the attention of management any concern or matter relating to supporting pupils with medical needs.

Expectations

It is expected that:

- parents will be encouraged to co-operate in training children to self-administer medication if this is practicable and that members of staff will only be asked to be involved if there is no alternative;
- that employees will consider carefully their response to requests to assist with the giving of medication or supervision of self-medication and that they will consider each request separately.
- the school will liaise with the School Health Service for advice about a pupil's special medical needs, and will seek support from the relevant practitioners where necessary and in the interests of the pupil.
- Any medicines brought into school by the staff e.g. headache tablets, inhalers for personal use should be stored in an appropriate place and kept

out of the reach of the pupils. Any staff medicine is the responsibility of the individual concerned and not the school.

Administration of medicines

Medicines will only be administered at school when it would be detrimental to a pupil's health or school attendance not to do so.

Pupils under 16 years old will not be given prescription or non-prescription medicines without their parents' written consent.

Non-prescription medicines may be administered in the following situations:

- When it would be detrimental to the pupil's health not to do so
- When instructed by a medical professional

No pupil under the age of 16 will be given medicine containing aspirin unless prescribed by a doctor. Pain relief medicines will not be administered without first checking when the previous dose was taken, and the maximum dosage allowed.

The school will only accept medicines that are in-date, labelled, in their original container, and contain instructions for administration, dosage and storage. The only exception to this is insulin, which must still be in-date, but is available in an insulin pen or pump, rather than its original container.

All medicines will be stored safely. Pupils will be informed where their medicines are at all times and will be able to access them immediately, whether in school or attending a school trip or residential visit. When medicines are no longer required, they will be returned to parents for safe disposal.

Policy into Practice

There is a need for proper documentation at all stages when considering the issue of support for pupils with medical needs in school.

Policy adopted by the Governing body: September 2023

The policy will be reviewed annually.
