

## GoodBox Core

### Device overview

The GoodBox Core is an easy-to-use and fully integrated contactless donation device. The device is ideal for churches with no or low connectivity, or for churches who want the benefit of comprehensive remote support and device management.

- *Upfront cost:* £350+VAT. Leasing options start from £30 a month.
- *Monthly fees:* £17.50 a month.
- *Transaction fees:* 1.5% per donation. This is automatically deducted before donations are transferred into your church's bank account.
- *Connectivity not required:* donations will need to be uploaded via an internet connection at a later point, but internet connectivity is not needed at the point of making a donation. There is a SIM card in the device (included in the cost of the monthly fee) which can connect the device to the internet if you have mobile phone signal but no WiFi.
- *Securable for unattended use:* a Kensington lock (£15) can be used to secure it safely.
- *Works out the box:* simply turn the device on and start collecting donations.
- *Multiple donation amounts:* all devices are now able to have a multi-donation option layout if they like (see example to the right), which typically results in higher donation amounts.
- *Customisable artwork:* artwork can be personalised if you would like to include an image of your church. This is free if you supply the artwork; if you require GoodBox's design services, there is a charge of £50+ depending on the level of design time required.
