

Connect the Classroom

Connect your learning environments securely

Maintaining a state-of-the-art IT network is vital within modern learning environments especially with the ever-present uncertainty the pandemic provides. If you want to avoid unnecessary downtime and maintain your provision of rich educational experiences whether that's in the classroom or from home, then it's a good time to consider how to connect your classrooms securely. Stone helps schools connect all learning environments to maximise students learning outcomes whilst paying particular attention to **safeguarding**.

It has been essential for schools to create a modern learning environment whilst ensuring safeguarding measures are in place, this is where Stone Group can help.

Independent research recently commissioned by Stone Group showed that nearly **50% (46.7) of organisations don't believe they have the infrastructure to manage a 1:1 device scheme**.

Stone Group have been implementing Connect the Classroom solutions UK wide and have been on hand throughout to help schools and the education sector as a whole to improve their infrastructure and provide reliable tech and support services.

Speak to an account manager today to discuss funding options to create a modern learning environment with Stone Group.
