Dates of future meetings:

- Monday 17th July 23, 4.30pm, following induction and refresher beginning at 3.30pm - Freind Room, Christ Church
- Monday 11th September 10.00am - McKenna Room, Christ Church
- Monday 13th November 10am - McKenna Room, Christ Church

3	Correspondence, policy and other matters for consideration
---	---

Net Zero guidance for parishes and the DAC

The Committee discussed the documents, and the context of them, at length and supported their intention, with the comments that the emergency heating replacement note should be made shorter and more digestible.

DAC membership - introduction and refresher July 23

The committee heard that, following the recruitment of new members and advisors, the first meeting for which will be the July DAC, an introduction and refresher to the diocese and the DAC will be held prior to the meeting on the 17th July, beginning at 3.30pm and held in the Freind Room, Christ Church. The Chancellor, Diocesan Registrar, Diocesan Secretary, DAC Chair and Head of Church Buildings will all give brief introductions to their roles in the process, and provide information on recent changes, updates affecting the work of the DAC and the wider diocese, and some thoughts for future work and the year ahead. New and existing members and advisors are asked to attend wherever possible.

Church Buildings Team staffing update

The committee welcomed Debbie Perry to the Church Buildings Team as the Casework Co-ordinator, as Carolyn Jupe's role shifts focus and is reflected in a change of title, to Casework Supervisor.

4	Applications submitted to DAC since the last agenda

5	Casework - Returning
---	-----------------------------

There is no returning casework.

6	Casework - New
---	-----------------------

Oxford St Mary the Virgin			
2023-084340	Oxford	Grade: I	SH
Proposals:	Restoration of the gardens, conservation of stonework, provision of an accessible toilet, renovation and extension of the kitchen facilities within the vaults café and optimization of space in the café, measures to bring the café closer to net zero carbon, and increase security measures on the site.		
Project architect:	Mark Hammond, Caroe & Partners		
Statutory consultees:	LPA, Historic England, CBC, SPAB, HBAP		
Site visit attendees:	Rev Dr Peter Groves, Ms Charlotte Robinson, Mrs Helen Ensor, Mr Julian Munby. From the amenity societies: Rev Canon Adrian Daffern (CBC), Rev Canon D Delap (CBC), Mrs Rachel Fletcher (Historic England)		
Date of visit:	08/03/2023		
May DAC Minute:			
The committee ratified the CBO's feedback letter, agreeing that the parish had demonstrated a well-evidenced need to improve and refurbish both the back-of-house café facilities, and the outside café seating area in what			

was formerly the north churchyard of the university church. The committee agreed to the principle of the following works:

- Removal of the existing cramped internal customer lavatories in order to both augment and renovate the confined and dilapidated kitchen facilities and rationalise convoluted access arrangements for the back-of-house area
- Providing external fully accessible WCs and improving accessibility and storage externally- four options have been submitted, of which the delegation preferred option B
- Extending the area of hard standing externally into a lawned area in the north-east part of the garden, increasing the number of covers provided outside and easing pressure on the seating inside the café; replacing outside café furniture and improving drainage, all requiring some degree of relocation of grave ledgers
- Replanting and managing the existing garden, which has become overgrown, obscuring sightlines and light
- Improving lighting and security externally
- Repairing external stonework and conserving monuments in this area

The committee shared the delegation's view that the proposed Option B was to be preferred. This comprised a lavatory block facing into the courtyard with a small store attached, and an additional external store accessed from Catte Street side. This option included paving much of the lawned area to the north of the site, with the exception of the area of raised memorials, which would be kept *in situ*). The committee encouraged that there is an opportunity here to create a discrete but elegant piece of architecture, which adds to the character of the church and wider setting on the square. The DAC shared the delegation's concerns over the budget for this project: given the comprehensive proposals and the status of the setting affected by them, the proposed budget may not be enough to achieve everything which is desired to the satisfaction of all parties. Furthermore, the committee encouraged that, if possible, the landscaping scheme ought to include proposals to create level access to the church from the north side. Given major landscaping works are to be carried out, it seems a lost opportunity not to include this provision, which would be a substantial benefit for church visitors.

The project team are encouraged to carry out the following:

- Formulate Statements of Need and Significance for the project
- Update the existing Conservation Management Plan
- Conduct a storage audit for the café garden area
- Begin engagement with the LPA
- Refine proposals for the chosen option preferably in time for these to be discussed at the September DAC meeting

Kidmore End, St John the Baptist			
2023-084328	Dorchester	Grade: II	JS
Proposals:	Reordering to include provision of servery and WC facilities and replacement heating - options appraisal including possible extension		
Project architect:	Daniel Wadsworth of Jessop and Cook		
Statutory consultees:	Victorian Society		
Site visit attendees:	Archdeacon of Dorchester, James Mackintosh		
Date of visit:	28 March 2023		
May 2023 minute:			
<p>The DAC ratified the site visit report which recommended that the parish continue to develop the proposals for providing facilities in accordance with either Option A or Option B of the Jessop and Cook feasibility study. The parish were encouraged to take the cost of the project and available funding into account when deciding which option to progress. The parish should also continue to develop proposals for the replacement of heating with a hybrid system as recommended in the Fraser and Walker feasibility study.</p>			

Cookham Holy Trinity			
2022-073416	Berkshire	Grade II* Listed	SH
Statutory consultees:	Historic England, SPAB, Victorian Society, CBC.		
Reviewing members:	Ms G. O'Farrell (DAC heating adviser)		
Project architect:	N/A (Chris Reading)		
Proposals:	Heating overhaul as part of a wider reordering scheme- Installation of 12x Herschel Halo FAR infrared chandeliers (request for DAC view on new suggestion arising from Energy Audit)		
May DAC Minute:			
<p>The DAC recognised that this had been a transitional case in terms of the application of the new Faculty Jurisdiction rules and Net Zero requirements, as the project has been in planning since before these came into operation. The committee agreed that the PCC had now demonstrated due regard for the Net Zero legislation, having consulted an independent heating engineer, commissioning and beginning to enact the advice of an Energy Audit. The DAC agreed the parish had given an adequate explanation of having due regard to the Net Zero guidance.</p> <p>The DAC agreed to issue a split Notification of Advice for this application: a Recommend NOA for the west end facilities; removal of the pews and relaying of the floor in the areas currently occupied by pew platforms, subject to the usual conditions concerning archaeology and CSM legislation, plus the following specific provisos:</p> <ul style="list-style-type: none"> • The precise floor layout, together with the choice of stone, its colour and finish being agreed with the subcommittee prior to work beginning on the floor replacement • The ledgers which will be obscured by the WC being moved to the chequered walkway in the tower <p>For the heating, a Not Object Notification of Advice was agreed, subject to the detailed specification and radiator layout being agreed with the DAC's heating adviser. The reasons for agreeing to issue a Not Object NOA for the heating aspect of this application were:</p> <ul style="list-style-type: none"> • Since the DAC had previously agreed that it ought not to mandate modes of de-carbonisation in specific cases, anything which is prescriptive could be problematic • The DAC could not assure itself beyond reasonable doubt that installing an air source heat pump would be the right option in this case, nor could it disprove unequivocally the advice of the parish's heating engineer against installing one. <p>The reasons the DAC agreed not to issue a notification of advice recommending the proposals were:</p>			

- Concerns about the viability of the proposed background heating given current and projected usage patterns
- The DAC's heating adviser and the energy audit had reservations based on the belief that non-fossil fuel options would be possible here

Though the parish offered to commit to switching to a more environmentally-friendly fuel source by 2030, the committee did not agree that it would be fundamentally right to put *any* sort of condition on the NOA to this end, believing that if permission were granted for a gas boiler, consideration ought to be given to the embodied carbon in that system, in addition to the toll on the PCC in being required to plan another major overhaul so soon after the first. Moreover, with technology continually advancing, it was considered that the legislation would also likely have progressed to a point requiring the PCC to make a more environmentally-friendly change at the point that their system no longer worked, in any case.
