

## Integrating your GiveALittle Account with Stripe

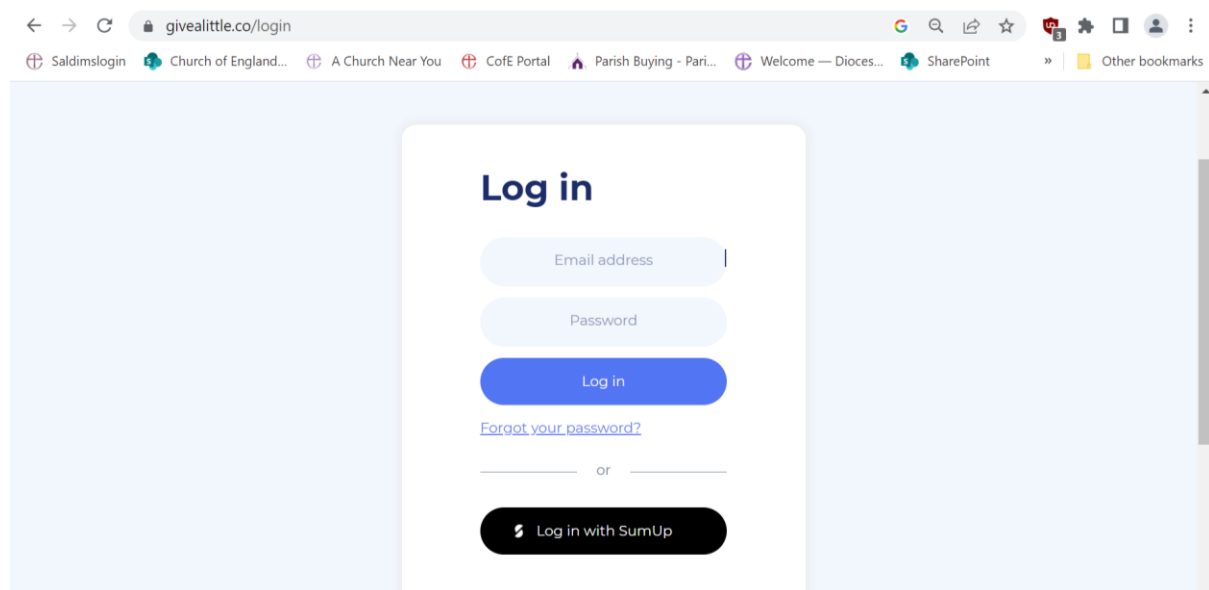

February 2023

Why? Stripe is another transaction provider, like SumUp. SumUp specialise in chip and pin card readers. Stripe provide better online giving functionality for website donations, and work with ApplePay and GooglePay – which makes your QR codes a million times more effective\* because the donor doesn't need to type in debit/card details.

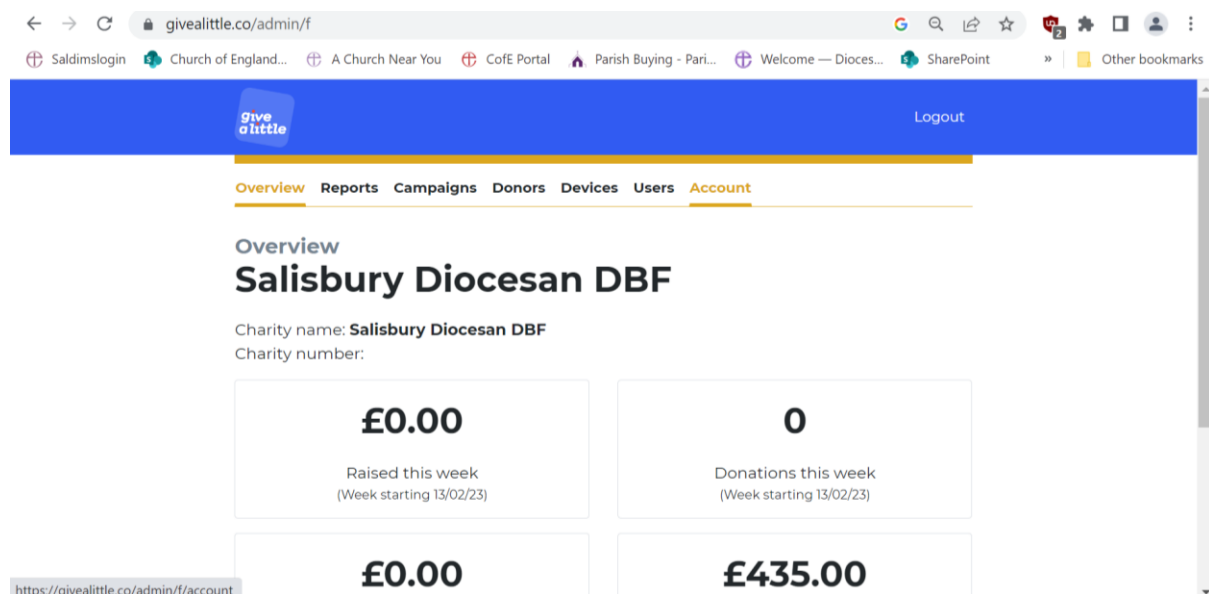

### 1. Login to Give A Little

IMPORTANT – scroll down, and login with your SumUp details (black button)

<https://givealittle.co/login>

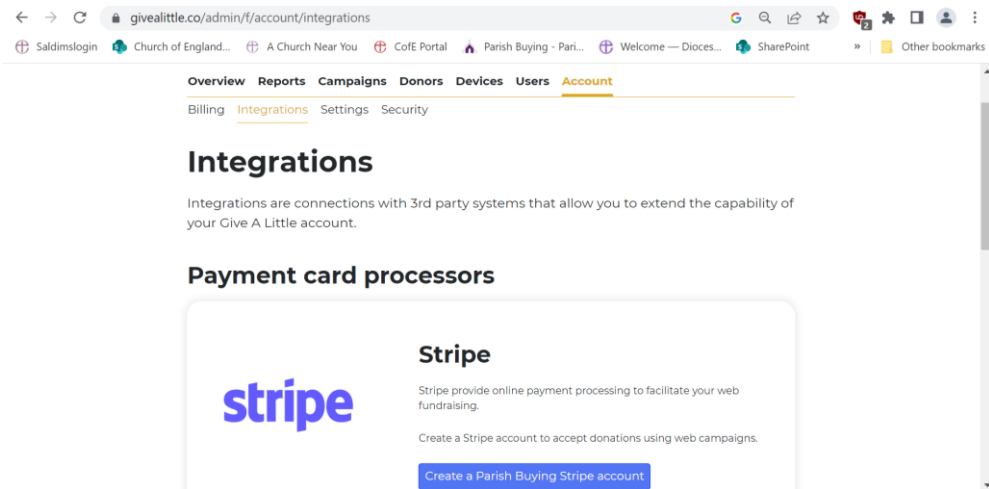

### 2. From your dashboard, select Account from the top toolbar – in orange below.

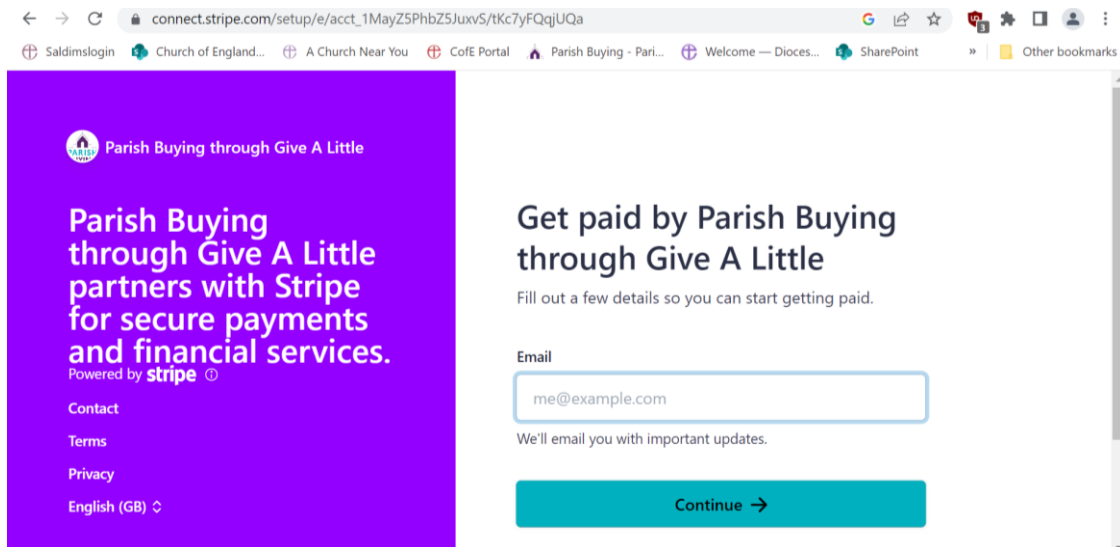

### 3. From 'Account' select 'Integrations'

You will see the option to Create a Parish Buying Stripe account

### 4. Create the Stripe account

You are redirected to a new site where you can create the account. It is not dissimilar to setting up through SumUp – eg you will need your financial information to hand.

Once you have done this, donors will see Apple/Google Pay an option when they scan the QR code.

Good luck!

*\*in my humble opinion*
