Importance of digital giving
Importance of digital giving

- On average, giving accounts for 75% of a church’s income.
- Need to have the right mechanisms in place for people to give.
- We live in an increasingly cashless society.
- ‘Digital giving’ (donations made either online or using a contactless device) are therefore an important way for churches to receive gifts.
- Online and contactless donations are also typically higher than cash donations. Contactless devices that offer a choice of donation amounts (rather than a default amount) also tend to receive higher donations on average (see chart on next page).
Importance of digital giving

Cash versus debit cards
UK payments 2008-2018 and forecast to 2028 (billions)

Importance of digital giving

Average online giving donation: £39.58

Average contactless donation (default): £6.02

Average contactless donation (choice): £10.30

Average cash donation: £2
Importance of digital giving

• In addition to exploring contactless, **online giving** is free and quick to set up.

• If you don’t currently have an online giving provider, take a look at our guide to online giving on Parish Buying by **clicking here**.

• To use our online giving provider, you will need to create an account with **Give A Little**.
Introduction to Contactless Giving
Introduction to contactless giving

• What is it?
  - Donation made at a contactless donation device, using a bank card or some kind of smart device (e.g., Apple Pay on iPhone)
Considering connectivity

• You don’t need an internet connection for all devices to work at the point of taking a donation.
  - But you will need to upload the donation later via the internet (e.g., connected to home WiFi).

• Lots of guidance about installing an internet connection available [here](#) on the Church of England website and [here](#) on Parish Buying.

• Connectivity does not have to equal broadband. Consider:
  - WiFi extenders
  - SIM cards
  - Mobile broadband routers
Connectivity – Four main solutions

• Wi-Fi from broadband connection
• Wi-Fi from mobile connection
• Mobile 3G/4G connection
• No connectivity
WiFi + Broadband connection

What is a ‘merchant account’?

• A merchant account is a bit like a bank account; it is what allows you to accept donations/payments and have them settled into your church’s bank account.

• Each contactless donation device provider will require you to set up a merchant account. Some providers manage this process; some just sell the hardware.
Questions to ask

• Does our church have connectivity?
• Do we want to also take payments?
• Do we need something that works out the box? Or would we like to be able to manage the device ourselves?
• Do we want a tap-and-go option? Or engaged donation experience?
• Do we want a portable, securable, or freestanding device? Where will it go in our building?
• Do we want to use the same provider for online giving?
• How much budget do we have available?
Devices available through Parish Buying
What is Parish Buying?

- Website and service provided by the national church.
- Range of goods and services for churches available: anything from energy to audio-visual equipment.
- Suppliers have undergone due diligence and provide good value, reliable services for churches.
- Free to use and more than one person from your church can register.
- You must go via the pages on Parish Buying to get the discounts available to churches (rather than going to providers direct).
- Starting point for a contactless device: register with Parish Buying, if you’re not already registered.
No connectivity needed – Coming Soon

• Due to changes with suppliers, we currently have limited options suitable for churches that have no WiFi or 3G/4G signal.

• GWD’s Donation Station (the tablet that is part of all their devices) is due to have offline capability soon.

• This is most suitable in the form of the GWD Midi (pictured) so that the device can be taken away from its main location and connected to WiFi in another location.

• We hope to offer more offline options again shortly.

SumUp®

- **SumUp Solo** – useable by itself to take payments
- **SumUp Air** – useable when paired with phone or tablet
- **SumUp online store** – allows sale of tickets, hall hire or any other products or services

QR code linking to online store item
Payments v donations

• It is important to use a SumUp card reader for processing payments, as they cannot be put through a contactless donation device.

• This is to ensure there is no confusion over what funds are eligible for Gift Aid reclaim and for VAT reasons.

• Having a device for payments also allows you to pre-set values for certain things e.g., cup of coffee, in a way that is smoother than trying to use a donations device to take payments.

• Some donation devices also use SumUp, which is instead paired with the Give A Little app for taking donations. This means you only have to set up one merchant account to receive both donations and payments.
Taking Payments and Donations

Some of the SumUp devices can be paired with a phone/tablet to take payments, but also take donations with the Give a Little App.

**Payments**

- SumUp Air
  - useable when paired with phone or tablet

- SumUp Solo
  - useable by itself to take payments

**Donations**

Give A Little works by connecting with SumUp to process donations and pay them into your church’s bank account.

The premium version is free of charge for Parish Buying members.

The SumUp Air and SumUp Solo are not included here as they are simple card readers, rather than self-service donation devices.

Remember: Never go direct, always go to parish buying for better pricing.
Getting the Most Out of Contactless
Getting the most out of contactless

• To create the best environment to encourage giving we need **good mechanisms** that allow people to easily give to our church.

• Alongside this we need to explain the **need** for people to give so they can understand how important their giving is and regularly communicate the **impact** of their gifts on the mission and ministry of the church. Finally **trust** must be built so that people have confidence that the church will spend their gifts wisely.

• **Digital giving** is a fantastic mechanism but to truly make the most of it you will need to demonstrate the impact of a gift made this way, the need for people to give and grow trust with your givers.
Getting the most out of contactless

• **Make it a team effort:** show a few people within your church how to switch the device on and off and how to connect it to the internet. Be sure to include people who regularly open and close the church and are there for life events. Having your device on and ready for people to use is the first step to taking donations.

• **Location, location, location:** set your device up in the perfect location where people can easily see the device and conveniently stop to donate. You will also need to take into account practical factors like access to a plug point and an area with good internet connection, if applicable.

• **Promote:** an eye-catching poster will help draw people’s attention to the opportunity to give. You may also want to put signs up in other parts of the building to let people know where they can make a contactless donation.

• **Explain:** make sure that people know how to give and the benefits of contactless giving. Perhaps someone could give a short notice about the device with a demonstration of how to give when you first get your device, or remind people it’s there during the notices. You could also display a poster by the device which explains how to make a donation so that it is easy for givers to use.
When to use contactless

• Think about when and where you can use contactless and online giving, such as:
  o Sunday services, online services
  o Life events: weddings, baptisms, funerals
  o Mid-week groups e.g. Messy Church
  o Fundraising events
  o Visitor donations

• How will you promote how to give in these contexts?
• How can you demonstrate the impact of a gift, the need for it, and why your church can be trusted with the donation?
Demonstrating impact

- Alongside your donation device include leaflets or posters that show the kind of things a donation could help fund.
- Don’t be shy about sharing the great things your church does and remember these don’t have to be large scale activities. Simply having the building open or providing funeral ministry will have an impact on your local community.
- Many people struggle to engage with number or statistics so short stories, quotes, and pictures are great ways of communicating impact.
Demonstrating need

• The Church of England is seen as a wealthy organisation and many people do not know that local churches and ministry is normally funded by local people.

• Including wording such as ‘this church is funded by the generosity of local people’ in supporting material both in church and online can help to combat these perceptions. You may also want to include how much your church costs to run each year.

• It is important to demonstrate the impact of gifts and talk about the need to give hand in hand so givers can understand the difference their gift could make as well as the financial need to make the gift.
Building trust

- Thanking people for their gift makes them feel their gift matters and builds trust. You can express your thanks for the gifts received in any promotional materials you have to support contactless or online giving. You can also personalise the thank you message that is shown once a donation is made.

- Think of other times that you thank people who give to your church such as after the offertory or at the APCM and be sure to include gifts made digitally within that.

- Operate within good practice by correctly claiming Gift Aid, being aware of when the device may have been used to take payments rather than donations and if running a specific campaign ensuring gifts are only spent on this.

- Include digital giving when you share with your congregation where income has come from and what it will be spent on.
