

# BE VOCAL

Action on climate change needs to come from each of us and from our government. That's why we need to be vocal about change.

In November, our country is hosting leaders from almost 200 countries at a conference called COP26. They will be working out how countries can respond to climate change. It is a key moment for us to be vocal and speak up.

**What will you ask world leaders to do to help tackle climate change?**

**BE THE CHANGE**
