

At All Saints' CE Primary, we are 'Children of God'. We wear our crowns with pride. Together we are Included, Involved and Inspired.

## INCLUDED

This year at All Saints, we were delighted to support the NSPCC by taking part in Number Day. We joined schools all over the country celebrating how much fun maths can be, whilst raising money for a great cause.

The national pandemic has made this year a tricky one for many, and as a result, the NSPCC needs our support more than ever. By raising money, we have been able to help to fund their vital services, such as Childline, and help them to prevent abuse and be there for children in need.

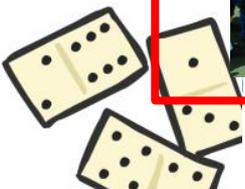

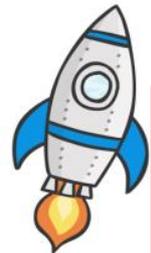

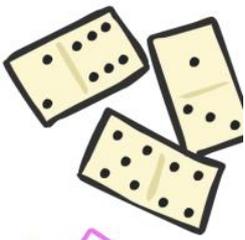

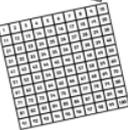

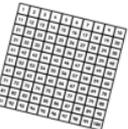

To celebrate Number Day, the children at All Saints' took part in a huge range of maths activities, puzzles and games which promoted a positive, 'can-do' attitude towards maths and proved how fun and meaningful maths can be.

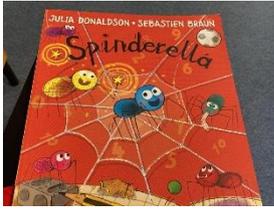

The children thoroughly enjoyed the day and made a super effort with their 'Dress up for Digits' outfits as you can see from all the photographs that follow!

Thank you to all the staff at All Saints' for the effort and inspiring activities that made our Number Day so successful.

**Reception** class went on a number and shape hunt around the school grounds, they collected ten natural objects and then placed them into two piles saying they had made ten. They then made shapes with their bodies.

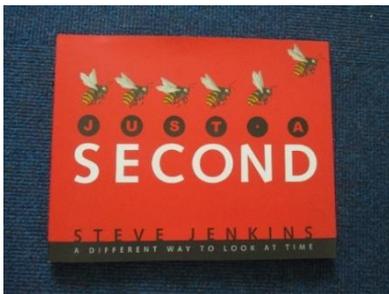

In the afternoon, the children did Maths through P.E. They took part in dice warm up games, they made equations based on how many bean bags they could throw into a hoop and played a game which involved getting into groups based on 'number of legs'- six legs = three children. To finish the session, they played 'What's the time Mr Wolf?' a firm favourite!

**Year 1** had a super, but a bit of a scary 'Number Day'! When they arrived at school they found spiders all over their classroom, some of the teachers reported finding spiders in their rooms as well and Miss Bacon even found one in her hair! After sharing the Spinderella story, Year 1 suddenly realised why there were spiders around the school; they wanted to learn their numbers too! To help the spiders with their learning, Year one practised their number formation and made some spider numbers. Noah made an amazing Rainbow one and we all shouted 'Up with Numbers!' like in the story.

The children listened to some fun number songs and performed actions to them for PE and also took part in the NSPCC Buddy Maths Number Challenge. Jackson and Liza were superstars at putting the jigsaw pieces together and helping Buddy.

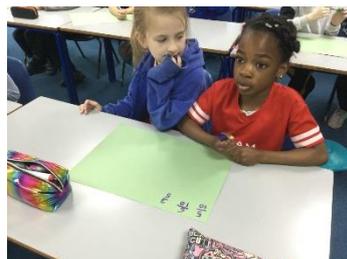

**Year 2** enjoyed reading a new book about what can happen in the natural world within a second, minute, hour, day and so on. Then they tried some practical activities outside to see what they could do in one minute. They also enjoyed some outdoor games based on direction and position.

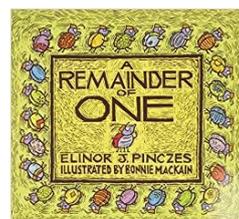

In class, they had a great time using their Maths skills when playing a variety of Maths games.

**Year 3** had a fun morning getting involved in Number day. The children looked at equivalent fractions, drawing picture to help them with their application. They were also treated to a super number-based nursery rhyme quiz created by Mrs Holmes! In the afternoon maths was incorporated into art; the children had to measure accurate shapes to help them to create Mayan mask. They also did some careful measuring of their triple jumps in PE.

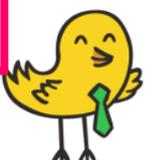

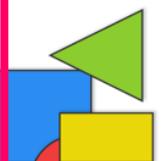

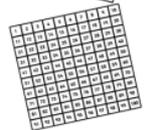

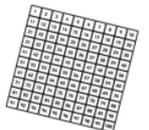

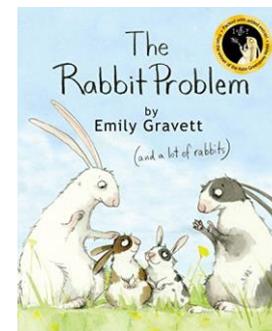

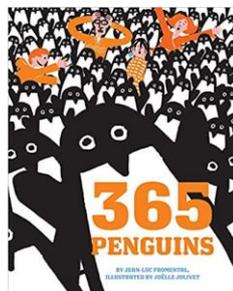

**Year 4** had a terrific morning playing frisbee golf in PE counting how many throws to get through each hoop then board games based around number. They finished the morning off with a story book about division with remainders!  
What a fun day 😊

Year 5 celebrated how much fun maths can be by having a morning of playing board and card games. The children had to read and follow instructions, use their communication skills, use their problem solving skills, practise their calculation skills and develop their resilience, whilst embarking on a little 'healthy' competition between friends.

They also enjoyed solving Buddy's Challenge and sharing some maths-based stories before home time.

Year 6 had a fun-filled competitive morning of managing money in a classic game of Monopoly! They needed to put their logic and communication skills to the test to see who would become the Monopoly millionaire!

# INVOLVED

Everyone in school got involved and the All Saints' Team made an amazing effort with their digit fancy dress!

Look at Mrs Lavery's amazing counting apron! I think the rest of the staff may be placing orders for your next Number Day!

One of our Reception children celebrated her 5<sup>th</sup> birthday on Number Day!

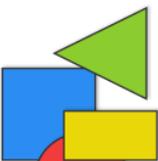

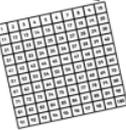

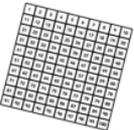

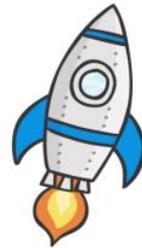

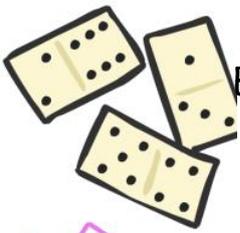

Thank you Mrs Homes for your super number-based nursery rhyme quiz!

Fabulously colourful number bunting Mrs Akinsanya!

Year 2

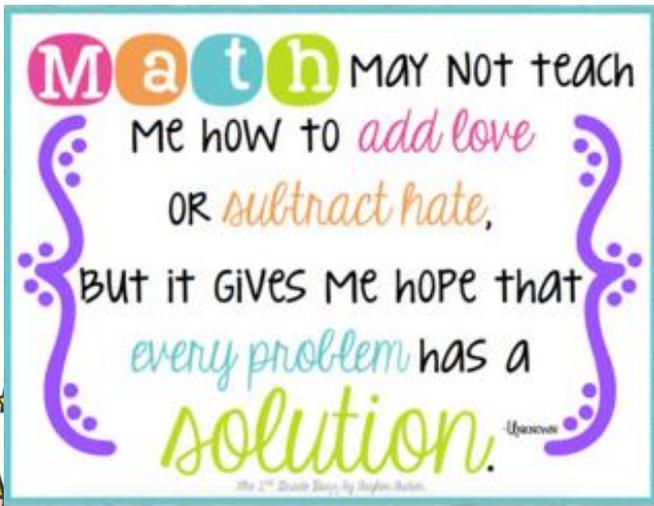

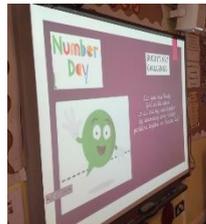

# INSPIRE

This year's Number Day was inspired by the NSPCC and the vital job that they do at supporting and keeping children safe.

The children learnt how it is really important to speak out to a trusted adult or grown up if they are ever worried, upset or need to talk. We talked about Childline, and how it is open 24 hours a day, 365 days a year, to listen to children and young people, whatever their worry, whenever they need help or have a problem they feel they can't talk to anyone else about.

In total, All Saints' raised over £120 to donate to NSPCC, a great effort in the current circumstances!

Some of the children in school took part in the Buddy's Challenge from the NSPCC. They had to solve clues to find the pieces of key hidden around the classroom to let Buddy through the magic door.
