

On 13th March 2020, St Mary's hosted a MAT Science Share. As part of Science Week, we welcomed children from four other MAT schools. We were fortunate to be awarded a grant from the Armourers & Brasiers Materials Science Scheme which allowed us to hire the Cambridge Science Centre to come and deliver a science show and bring an interactive exhibition. We worked with Woodbridge School, who kindly allowed us to hold the science show in its lecture theatre. Each school brought science experiments which they explained to the children from other schools.

It was a wonderful opportunity for children from across the MAT to learn and play together.
